Education

The New School, Parsons School of Design — New York, NY

BFA in Design and Technology, Minor in Data Visualization — *Expected May 2028*

Honors: Dean's List

Relevant Coursework: Data Structures and Algorithms; Python: Data, Science & Design

Experience

The Locale Creator — August 2026 – Present

Web Developer and Designer — *New York City, NY*

- Develop and maintain the entire website front end using HTML, CSS, and JavaScript, implementing responsive interfaces across desktop and mobile.
- Translate Figma prototypes into reusable UI components; use Git for version control and test layouts and navigation across devices.
- Develop backend functionality in Python and Node.js for user data management, website traffic tracking, and activity analytics.

Allstar Wine & Liquor — February 2024 – July 2026

Product Designer — *New York City, NY*

- Designed product labels and packaging in Photoshop, Illustrator, and InDesign, maintaining brand consistency across product lines.
- Prepared production-ready assets, refining typography, imagery, layouts, and print specifications.
- Created promotional designs and updated website content to support digital marketing, contributing to a 35% increase in website visits.

Amerasia Bank — May 2025 – August 2025

Finance and Accounting Intern — *New York City, NY*

- Reviewed and reconciled approximately 50 transaction records daily using Fintable and Plaid to support accurate financial reporting.
- Assisted with financial statements and budget reports, compiling transaction data and supporting documentation for accounting reviews.
- Reviewed loan, investment, and deposit documentation and maintained client records to support accounting operations and compliance reviews.

Projects

Pidge - Health in Climate AI Hackathon — September 2026

Front-End Developer — *Cornell Tech, New York, NY*

- Developed the entire front end of Pidge, a climate-health prototype, using Next.js, React, TypeScript, and Tailwind CSS; built a provider dashboard with interactive ZIP code risk maps and data visualizations of patient statuses and nearby resources using Recharts and Leaflet.
- Collaborated on a team prototype using machine learning for predictive risk stratification based on health and environmental data; developed dashboard workflows for automated check-ins, resource matching, care-team escalation, and follow-up to prioritize unresolved high-risk cases.

Leadership & Extracurricular

Design and Technology — April 2026 – May 2026

Student Assistant — *New York City, NY*

- Provided technical support and troubleshooting for student software and hardware projects during senior exhibition preparation.
- Coordinated equipment setup and multimedia installation support, helping bring student projects from development through exhibition.

Robotics Team — August 2025 – May 2026

Team Member — *New York City, NY*

- Developed embedded software in C++ and Python for Arduino, ESP32, and Raspberry Pi systems, supporting sensor processing and robotic control; used machine learning to guide robot movement.
- Collaborated with mechanical and electrical teammates on component design, hardware-software integration, troubleshooting, and system testing.

Skills

Languages: Python, C++, JavaScript, TypeScript, HTML, CSS

Frameworks & Runtime: React, Next.js, Node.js, Tailwind CSS, Recharts, Leaflet

Tools & Platforms: Git, Visual Studio, Arduino, ESP32, Raspberry Pi, Figma, Microsoft Office
